Recent Arrival! 18/28 City/Highway MPG

Awards:
 * 2014 KBB.com 10 Best Luxury Cars Under \$40,000

Reviews:
 * The Cadillac ATS is a first: an entry-luxury sports sedan with rear-wheel drive and great performance from an American manufacturer. If that appeals to you, head down to the local Cadillac store and give it a try. Source: KBB.com
 * Excellent handling; fun-to-drive character with either 2.0-liter turbo or V6 engine; cutting-edge interior design. Source: Edmunds
 * Athletic and expressive, the 2014 Cadillac ATS exquisitely fuses form with function. Besides giving it a bold, distinctive appearance, its taut lines allow the ATS to slice through the air, while brilliant details like the available illuminating door handles add sophistication. The ATS includes stunning painted or polished 17-inch wheels surrounded by performance tires. Available polished or machine-finished 18-inch wheels also make a powerful impression. The available vertical headlamps with LED light signatures are as brilliantly designed as they are just plain brilliant. The ATS reveals its refined side in the precise, handcrafted cut and sewn interior. Available leather seating surfaces come in an array of rich colors complete with French stitching and are finely accented by distinct interior themes. Complementing the athletic nature of the ATS, available bolstered performance seats with thigh extenders are not only remarkably comfortable, but help keep you firmly planted during spirited driving. The welcome warmth of the available heated front seats and steering wheel is the perfect antidote for a cold winter morning. Choose from three engines, the powerful and efficient 2.0L turbo that delivers an impressive 272 HP; the award-winning 3.6L V6 engine that boasts 321 HP; or an exhilarating 2.5L engine that, along with the 2.0L turbo, offers over 30 mpg hwy. The available Tremec 6-speed manual transmission was designed exclusively for the ATS and is available on the 2.0L turbo engine with RWD. With the ability to use multitouch gestures like tap, swipe, and pinch, the available CUE is as easy to use as a smartphone or tablet. Find a song, make a call, input destinations through the available navigation system, and more through voice recognition. Using a combination of radar and vision-sensing technology, available full-speed-range Adaptive Cruise Control maintains a selectable preset distance between you and the vehicle in front of you.
